COLE CIPRARI

BUSINESS SYSTEMS ARCHITECT · OPERATIONS TECHNOLOGY & AI AUTOMATION

Worcester, MA | (508) 688-5824 | cole@ciprari.ai | **ciprari.ai** | linkedin.com/in/coleos

PROFESSIONAL SUMMARY

Systems architect who **designs the architecture and ships the code** — 15+ years scaling the operational systems businesses run on, plus **15 production platforms built solo**, including a 120-route construction ERP and a multi-tenant SaaS estimating suite serving 25+ trades. Owns the full lifecycle end to end: requirements discovery, platform evaluation, integration and data-model design, build, migration, training, and post-launch adoption measurement. Repeatedly removes manual work at the root — 70% of manual data entry eliminated, 250+ labor hours reclaimed annually, 18% schedule variance reduction — while carrying P&L accountability for portfolios up to $8.5M. Treats agentic AI (Claude Code, OpenAI APIs) as production infrastructure, not novelty.

15	$8.5M	3,000+	70%	240+	99.9%
PLATFORMS BUILT SOLO, SHIPPED	PORTFOLIO UNDER ARCHITECTURE	USERS SERVED BY SYSTEMS BUILT	MANUAL ENTRY ELIMINATED	PROCESSES DOCUMENTED	SYSTEM UPTIME MAINTAINED

PLATFORMS ARCHITECTED & SHIPPED — SOLO

All fifteen are live. Explore them interactively at **ciprari.ai** — a working desktop environment I built as this résumé's companion.

Coen Construction Platform
coenconstruction.com
Full construction ERP + public site — 120+ routes. AI estimating (SOW/MTO generation), AR measure, margin guard, sub bid & onboarding portals, customer e-sign approval, Stripe payments, payroll with ADP mapping, crew scheduling, GPS field/supervisor apps, Twilio dialer & SMS, permit portals, P&L and cash-flow dashboards, plus a complete snow-operations dispatch module (routes, storms, salt, reconciliation, AR).

Estimate.Pro
estimate.pro
Multi-tenant SaaS estimating suite for 25+ trades. ONNX on-device AR measurement, AI scope-of-work drafting with per-line confidence scores, Home Depot / Lowe's SKU cost library with price-decay alerts, subcontractor bid portal, white-label proposals, canvas e-signature, Stripe Connect payouts, margin guard, four-tier plans with role permissions and SSO.

CurbScript
curbscript.com
AI SaaS for real-estate agents — 24+ generation tools. MLS listing copy in under 30 seconds, AI listing video for TikTok/Instagram, voicemail and SMS scripts, buyer blasts, brand-voice tuning, bulk processing, and team seat management.

The Punchlist
thepunchlist.vercel.app
AI automation consultancy platform. Interactive AI advisor that scopes a fix from a plain-English bottleneck, a searchable library of shipped use cases / custom apps / integrations with live UI previews, a 49-industry taxonomy, and productized outcome-based pricing tiers.

JetDesk.AI
jetdesk.ai
Offline-first flight-planning PWA for a PA-46 turboprop. The full FAA airport and runway database embedded in a single file so planning works with no signal, winds-aloft-corrected legs, fuel-burn and fuel-stop detour optimization, live METAR/TAF runway verdicts, crowd-shared fuel prices synced across devices via a PIN (Cloudflare Pages Functions), and ForeFlight/SkyVector deep links.

North Point Construction
north.construction
GC platform with programmatic local SEO across 94 towns and 7 counties, plus a free AI design-preview tool that turns customer photos into concept renders as a lead-generation engine.

Valhalla K9 Services
valhalla-k9.com
Small-business site for a women-owned dog training company in Plymouth, NH — Lakes Region local SEO, service catalog, gallery, client reviews, and text-first lead capture.

Hire Mariaelena
hiremariaelena.com
Personal web résumé for an HR generalist — evidence-first structure, a capability tag grid built for keyword-scanning recruiters, Worcester–Boston local SEO, and mobile-first static delivery.

Show It With Words
showitwithwords.com
E-commerce storefront for a handmade letter-bead bracelet business (on Etsy since 2014) — every product rendered live as procedural SVG, a six-step build-your-own configurator with flat-lay and on-form previews, cart with bundle pricing and provider-ready checkout, and crawlable SPA routing with Store/LocalBusiness structured data.

PermitSketch
permitsketch.com
Deck and porch permit drawings from a phone — address, site photos and field measurements in; an 8-sheet 11x17 PDF set out (elevations, plan, framing, footings, section, details), every unconfirmed value flagged VERIFY IN FIELD. Freemium SaaS with per-project and Pro tiers.

Atelier
atelier.ciprari.ai
A personal AI studio as an installable PWA — answers, code, images, video, ideas and single-file apps across models from seven providers, behind one Cloudflare Worker that keeps every key server-side; an agent with 40 tools that asks for approval before it sends, posts, refunds, deploys or deletes anything. Open to 25 LinkedIn testers.

Keep Fix Cut
keepfixcut.com
A free AI teardown of a dating profile — Claude grades each photo keep, fix or cut and rewrites the prompts; Whisper on Workers AI scores voice prompts; the photo editor runs in the browser. One Cloudflare Worker, rate-limited per IP, stores nothing.

Aurora
myaurora.base44.app
IPTV media control center and smart-home orchestration app — streaming player, EPG guide, TV mode, device control, lighting scene automation, and a remote interface.

Northern Hardy Honey
hardy-hive-harvest.base44.app
E-commerce and education platform for a New England apiary — storefront, checkout, order status tracking, pollination-services booking, and recipe content.

Mari' Cosmetics
mariaelena.base44.app
D2C cosmetics storefront with a guided "Find Your Shade" product matcher and editorial looks catalog.

PROFESSIONAL EXPERIENCE

EDGEBALL STRATEGIES

Director of Media & Intelligence (Contract) | Oct 2026 – Present

- Run Edgeball's publishing operations and commercial partnerships. Wheels Car Rental System is the anchor sponsor of The Edgeball Edge.

Editor in Chief, The Edgeball Edge (Contract) | Sep 2026 – Present

- Editor in Chief of The Edgeball Edge, Edgeball Strategies' LinkedIn newsletter for fleet, rental and dealer loaner operators: operational intelligence from Edgeball's Deal Desk, written as blueprints rather than thought leadership.

CIPRARI.AI

Founder | Aug 2026 – Present

- Founder of Ciprari.AI, the practice behind ciprari.ai: ColeOS, a résumé built as a working retro operating system with an AI assistant, an App Builder and a Job Fit Analyser, plus changelog.ciprari.ai, a build log that writes itself.

COEN CONSTRUCTION

Project Portfolio Manager | Oct 2025 – Present

Scope: Systems & AI Architecture — company-wide platform ownership, $8.5M portfolio

- **Built the Company's Operating System:** Architected, developed and deployed coenconstruction.com — a 120+ route construction ERP spanning AI estimating, AR measurement, subcontractor bid and onboarding portals, Stripe payments, ADP-mapped payroll, three role-specific field apps, a full Twilio telephony stack, and P&L/cash-flow dashboards. Sole architect and sole engineer.
- **AI & Agent Architecture:** Designed the agentic automation tier running on Claude Code and LLM APIs — quantity takeoff analysis, contract and submittal review, scope-gap detection and recurring reporting — compressing multi-hour analyst tasks into minutes. Architected prompts as stateless, reproducible workers with a mandatory human review gate before any write to the system of record.
- **Enterprise Platform Architecture:** Owned requirements definition, vendor evaluation, data-model configuration, migration and training curriculum for the project-management platform across every team and 15+ concurrent projects; enforced data-integrity controls and instrumented adoption to full utilization.
- **Scheduling Systems Design:** Built the enterprise Primavera P6 architecture — standardized WBS, activity coding and calendar structures portfolio-wide — reducing schedule variance 18% and lifting on-time delivery to 94%.
- **Data & Workflow Architecture:** Designed the analytics layer consolidating critical-path performance, cost variance and resource utilization into a single executive view; re-architected change orders from ad-hoc email into a standardized, auditable, gated workflow governing an $8.5M portfolio.

HANNAFORD BROS. CO., LLC

Evening Operations Manager | Apr 2025 – Aug 2025

Scope: Performance Systems Architecture — 10 departments, 40+ users, $250K budget

- **Instrumentation & Telemetry Design:** Architected real-time performance tracking across 10 departments and rebuilt shift-handoff protocols as a structured data capture rather than verbal relay — internal audit score 88 → 96 in two months; after-hours incidents down 22%.
- **Optimization Modeling:** Built a demand-driven labor allocation model on a $250K budget, replacing habit-based scheduling with data — 250 hours reclaimed annually, 8% labor reduction; vendor consolidation and renegotiated terms saved $20K/yr with $50K further opportunity identified.
- **Rollout & Adoption Engineering:** Drove adoption of the new system across 40+ users through transparent metrics dashboards and a fixed stakeholder cadence — treating adoption as the deliverable, not the launch.

ANDYMAN DESSERT BAKING CO.

Operations Manager | Dec 2023 – Jul 2024

Scope: Systems Integration Architecture — POS / inventory / finance data layer

- **Integration Architecture (0→1):** Architected and delivered the POS-integrated inventory and financial-reporting system — mapped data flows across point-of-sale, inventory and accounting, normalized the schema, and chose an integration layer over a three-system replacement. Eliminated 70% of manual data entry and shipped a real-time executive dashboard for inventory position and cash flow.
- **Automated Decision Support:** Built the tracking and monitoring layer on top of the new data model — inventory turns +12%, waste −9%; a margin-aware pricing model designed against the resulting visibility lifted revenue 18% while protecting margin.
- **Governance & Control Design:** Authored and enforced a 40-SOP control framework across food safety, compliance and cash handling with versioned updates — zero compliance lapses, perfect 100 health-inspection score.
- **Infrastructure Delivery:** Ran a $120K capital build from planning to handover — timeline design, vendor management, milestone tracking — delivered under budget and on schedule, unlocking a new revenue stream.

NAPLES PIZZERIA

Managing Partner | Feb 2020 – Jan 2023

Scope: Systems & Automation Ownership — cloud HR stack, $1.2M P&L

- **Cloud Systems Migration:** Evaluated, selected and deployed a cloud-based ATS with standardized, automated onboarding workflows — hiring cycle compressed 10 days → 3 days, new-hire ramp time cut 65% across a 25-person team.
- **Algorithmic Incentive Design:** Architected a performance-based compensation model tying individual payout directly to measured business-growth targets — a rules engine rather than discretionary bonuses — turnover down 35%.
- **Commercial Systems & P&L:** Full P&L ownership of a $1.2M unit; scaled revenue $650K → $900K with 15% YoY margin expansion. Implemented vendor-managed inventory (VMI) contracts to automate replenishment, cutting annual food costs 12%; zero permitting or licensing lapses.

TSD RENTAL, LLC

Operations Manager / Strategic Planning Lead | Jul 2014 – Feb 2020

Scope: IT Infrastructure & Systems Architecture — 2 sites, $1M assets, $400K budget

- **IT Infrastructure Architecture:** Led CAPEX IT infrastructure programs across two commercial facilities from architecture through execution — vendor selection, integration sequencing, capacity planning and resource allocation for multi-site expansion.
- **Single-Source-of-Truth Design:** Consolidated a fragmented software-licensing and vendor-contract estate into one tracked registry with automated renewal monitoring and standardized pricing, eliminating two operating silos — $30K annual savings with continuous audit readiness.
- **Reporting & Metrics Architecture:** Built the multi-site operating-metrics dashboard covering revenue, asset utilization, labor cost and compliance — the first apples-to-apples comparison between facilities and the leadership decision baseline. P&L for $1M in assets on a $400K budget — 98% asset utilization, $75K annual efficiency gains.

LIBERTY MUTUAL INSURANCE

Operations Process Improvement Specialist | Jan 2010 – Jul 2014

Scope: Automation & Enterprise Knowledge Architecture — 200+ processes, 3,000+ users

- **Automation Architecture (Pre-LLM):** Designed and implemented the RPA and workflow-automation program across claims operations — identified the highest-volume, most error-prone steps, redesigned the underlying workflow, then automated it. Errors reduced 15%, process cycle time improved 22%. Same discipline I now apply with agentic AI; the tooling changed, the architecture did not.
- **Enterprise Knowledge Architecture:** Owned the divisional knowledge base of 200+ processes serving 3,000+ users at >99.9% uptime — governed versioning, regulatory compliance and change rollout at enterprise scale.
- **Observability & Continuous Improvement:** Built the automated metrics framework tracking cycle time, error rate and productivity, replacing manual status collection with live instrumentation; facilitated cross-functional Kaizen events that fed the automation backlog.

EARLY CAREER

Sales, Recruiting & IT Foundations | Nov 2002 – Dec 2009

- **Exsos LLC — Senior Account Executive, IT Staffing** (Andover, MA · Jan 2008 – Dec 2009): Built the TD Banknorth relationship single-handed through the Commerce Bank merger, supplying qualified IT candidates to integrate their financial systems; clients included Millipore, Harvard Business School, F5 Networks, TripAdvisor and Iron Mountain; ran recruiting operations on the Bullhorn ATS.
- **Technology Seed, LLC — IT Technician / Support, Contract** (Londonderry, NH · Sep 2008 – Mar 2009): First- and second-level support across Windows Server 2003, Exchange 2007, Active Directory, DNS/DHCP, VOIP telephony and Cisco networking; managed backup processes and network expansion.
- **Datamonitor — Senior Account Executive, Healthcare/Pharma** (New York, NY · Jan 2005 – Jan 2008): $275K+ per quarter in new business; prospected and closed Pfizer, AstraZeneca, Stryker and DeRoyal; worked directly with analysts to map product coverage to each client's actual gaps — needs analysis before the pitch.
- **Bad Boy Entertainment & Sean John Clothing — Marketing/Promotions** (New York, NY · Nov 2002 – Jan 2005): Artist logistics, event coordination and VIP handling for the label's roster; built the custom spreadsheets that tracked the marketing department's spend.

CORE SKILLS

Complex Business Systems · **Systems & Integration Architecture** · **Entity Schema & Data Modelling** · **Agentic AI in Production** · **Multi-Tenant SaaS** · **Full-Stack Delivery** · **RPA & Workflow Automation** · **P&L Ownership** · **Adoption & Change Management**

TECHNICAL SKILLS — APPLIED, NOT ASPIRATIONAL

AI & Agentic	**Claude & Claude Code** (certified) · **OpenAI API** (certified architect) · Google Gemini · Perplexity · agentic workflow design · prompt & context engineering · stateless reproducible prompt workers · human-in-the-loop review gates · LLM document & data extraction · AI image and video generation
Architecture	**Complex business systems** spanning finance, field ops, HR, compliance and customers · integration-layer design over rip-and-replace · entity schema & data modelling · state machines · single-source-of-truth design · API contract design · multi-tenant tenancy models · role-based access control · SSO (Okta, Azure AD, Google)
Product Engineering	React · Next.js · JavaScript · HTML/CSS · REST APIs · webhooks · **Stripe** & **Stripe Connect** · **Twilio** voice, SMS & voicemail (branded calling LOA) · **ADP** payroll mapping · **ONNX** on-device computer vision (AR measurement) · e-signature & document generation · **offline-first PWAs** & service workers · procedural SVG/canvas rendering · **iOS app build & App Store submission**
Low-Code / Rapid	**Base44** — entity schema design, record CRUD, connector integrations, multi-page routing, deployment (3 apps shipped) · Vercel · rapid prototyping to production
Cloud & Infra	**Cloudflare** Workers, D1 (SQLite), Pages + Pages Functions, DNS, Registrar, Email Routing, WAF · SQL & schema migrations · Git / GitHub · CI-style deploy pipelines · CAPEX IT infrastructure planning · multi-site network & systems buildout
Automation	**Robotic Process Automation (RPA)** · Zapier · API orchestration · scheduled reporting pipelines · lead-scraper and triage automation · dispatch & routing automation · renewal-tracking automation
Project & Portfolio	**Primavera P6** (enterprise WBS, activity coding, calendars) · Microsoft Project · **Procore** · Buildern · **Jobber** · Contractor Foreman · BuilderTrend · critical-path & time-impact analysis · cost loading · change-order control

Data & BI	Advanced Excel modelling · Google Sheets · **Looker Studio** / Google Data Studio · KPI & dashboard architecture · SQL querying · variance & margin analysis · business-case & ROI modelling · **Google Analytics 4** · web analytics
Enterprise Systems	ERP · POS integration · **QuickBooks** · HRIS · ATS · inventory management · contract & vendor management platforms · Google Workspace · Microsoft 365
Growth & Marketing	**Programmatic SEO at scale** (94 towns, 7 counties) · local schema & structured data · Google Ads · Google Tag Manager · Angi lead pipelines · email campaign automation with performance benchmarking · review capture · conversion-focused landing architecture
Operations	**Lean / Kaizen** · Six Sigma principles · root-cause analysis · **SOP authoring at scale** (240+ processes) · change management & training curriculum design · UAT & adoption measurement · demand-driven labour modelling · vendor negotiation & VMI contracts · compliance & audit readiness · P&L management to $8.5M

CERTIFICATIONS & CREDENTIALS

COMPLETED

Claude Code Certified — Anthropic · **OpenAI Certified Architect** — OpenAI

IN PROGRESS — TARGET Q3/Q4 2026

Google Cloud **Generative AI Fundamentals** skill badge · Google Cloud **Introduction to Large Language Models** & **Responsible AI** · Google Cloud **Agentic AI** · **Google Analytics 4 (GA4) Certification** — Google Skillshop · **Automation Anywhere RPA Essentials** · **Kaggle** Python, SQL & Intro to Machine Learning

HOW I WORK

- **I Architect It and I Build It**
  Fifteen production platforms shipped solo, from a 120-route ERP to a multi-tenant SaaS suite. I don't hand specs to a team and hope — I can take a system from whiteboard to deployed.
- **Every Build Carries a Business Case**
  Architecture justified in P&L terms and measured after launch. I have owned the budget, not just the implementation — which changes what you're willing to build.
- **Adoption Is the Deliverable**
  A system nobody uses is a failed project. I design the training, change management, and success metrics alongside the architecture — never after it.
- **AI Needs a Review Gate**
  Agentic automation is production infrastructure, not a demo — but only when a human approves anything that reaches the system of record.
